

GeoSpring™ Hybrid Water Heater

Benefits:

Saves \$325 every year* in water heating expenses (*Based on DOE test procedures and comparison of 50-gallon standard electric tank water heaters using 4879k/Wh per year vs. the GeoSpring hybrid water heater using 1830kWh year).

Uses up to 62% less energy than a standard electric 50-gallon water heater.

Proudly assembled in Louisville, KY.

Provides the same hot water recovery as a traditional 50-gallon standard electric water heater with 65 gallons first hour rating.

Installs like a standard electric water heater with the same water and electric connections.

Limited 10 year warranty provides peace of mind and dependability.

Reduce Your Carbon Footprint

If just 25% of U.S. households purchasing a new electric water heater in a given year were to choose GE's hybrid water heater over a standard 50-gallon electric water heater, more than 4 billion lbs. of CO2 emissions from the U.S. grid could be avoided annually.

Easy-to-Use Control Panel

The GeoSpring electric heat pump water heater is one of the first residential electric water heaters with an electronic back-lit LCD display. With 4 modes and a vacation setting to choose from, you can start maximizing your energy savings immediately.

The electronic control panel will allow you to select between four (4) operating modes with a full description of which mode is the most energy efficient.
