

SolarWorld delivers the perfect trifecta for your solar investment: a solid history, superior performing products and a sound financial foundation. A trusted solar leader, SolarWorld has been innovating and manufacturing photovoltaic technologies on American soil for more than 38 years—creating American jobs, leading American innovation, supporting American communities and providing relief to Americans faced with rising energy costs.

**High-performance,
Superior Quality,
Made in America since 1975**

As the largest and most experienced solar manufacturer in the USA, SolarWorld's Sunmodule solar panels are designed and manufactured to the highest standards of quality, performance and durability. The grid-tied and off-grid products from

SolarWorld come in a variety of sizes, making them suitable for all applications – from a remote power generator to a large-scale power plant. As the largest U.S. solar manufacturer for more than 35 years, SolarWorld is uniquely recognized as America’s solar leader. We meticulously carry out the most important steps in the solar production process on U.S. soil—from sourcing and manufacturing to assembling and hiring.

The SolarWorld Standard

At SolarWorld, our solar technologies are different because we’re different. This difference is demonstrated every day in The SolarWorld Standard, which goes beyond quality assurance to elevate solar to unprecedented standards.

Our commitment to quality has powered our success for more than three decades. Unlike manufacturers of disposable electronics like cell phones and laptops, we create sophisticated solar technologies designed to produce clean energy for at least 25 years—even in some of the harshest weather conditions like blizzards, high winds, hail and coastal sea spray.

From inception to installation, we meticulously control and sustainably execute every step of the solar panel manufacturing process. The result is maximum, cost-effective performance from every SolarWorld panel, every time.

Manufacturing excellence

We don't trust any part of the solar manufacturing process to anyone else. We strictly control the creation of every SolarWorld solar system from beginning to end. We manufacture and produce every cell and assemble every panel in our state-of-the-art facility in Hillsboro, Oregon.

Exceeding the highest standards

Because of this commitment to excellence, our solar panels—and our operations--consistently meet or exceed the most stringent performance, environmental and employment standards.

- Highest quality products
- Reliable delivery schedules
- Local warranty and product support
- Real energy independence vs importing
- Meets and exceeds Buy America requirements
- Avoids environmental costs of overseas shipping
- Money spent stimulates the US economy and creates US jobs
- Processes meet stringent US labor and environmental policies

Creating American jobs

Not only do we employ hundreds of Americans at our facility in Oregon, but SolarWorld helps stimulate the U.S. economy by sourcing domestically whenever possible as well. Since 2008, SolarWorld purchased **more than \$1.4 billion** in equipment, parts, services and supplies from 50 states, plus the District of Columbia and Puerto Rico. This creates even more American jobs and supports American businesses.

Helping America achieve energy independence

Together, we can break America's dependence on foreign and nonrenewable energy supplies—cleanly and sustainably while supporting the American economy.

A Proven History, A Bright Future

Since our founding in 1975, homeowners, businesses, schools, government enterprises, utility companies and other forward-thinking leaders around the globe have trusted us to provide the most reliable, highest-producing solar solutions available.

Hundreds of SolarWorld team members sustainably execute every step of the solar manufacturing process at our state-of-the-art manufacturing facility in Hillsboro, Ore., while our sales, marketing, customer service and engineering teams are based in our Camarillo, Calif. headquarters.

When you invest in solar, you want a company that not only has a proven history of success, but one that will stand by its products for decades to come. Unlike others that also manufacture disposable electronics like cell phones, solar is all we do—which is why we do it so well.

SolarWorld Stands for Sustainability

Our commitment to sustainability begins on the inside. It starts with how we manufacture our products, choose our materials and treat our employees, then it extends outward to the communities we serve. Our commitment encompasses both economic and social sustainability and includes our factories, suppliers and employees. It is part of our identity and clearly differentiates SolarWorld from the rest of the solar manufacturing industry.

Our corporate culture encourages employees to live and work sustainably. We provide opportunities for employees to get involved in local recycling programs, reduce their workday commutes and support green initiatives in their communities.

Our sustainability efforts focus on three primary areas: energy conservation and climate protection, waste and air--pollution reduction, and water conservation.

A legacy of trust and performance you can bank on

Sunmodule⁺ Plus Solar Panels

SolarWorld Sunmodule⁺ Plus solar panels are available with silver or black components. These modules meet our stringent SolarWorld quality standards and meet and exceed all industry standards and certifications. They also carry our 25-year linear warranty to guarantee maximum performance through the lifetime of your system, by a 3rd party validation of our performance and reliability.

Key product features:

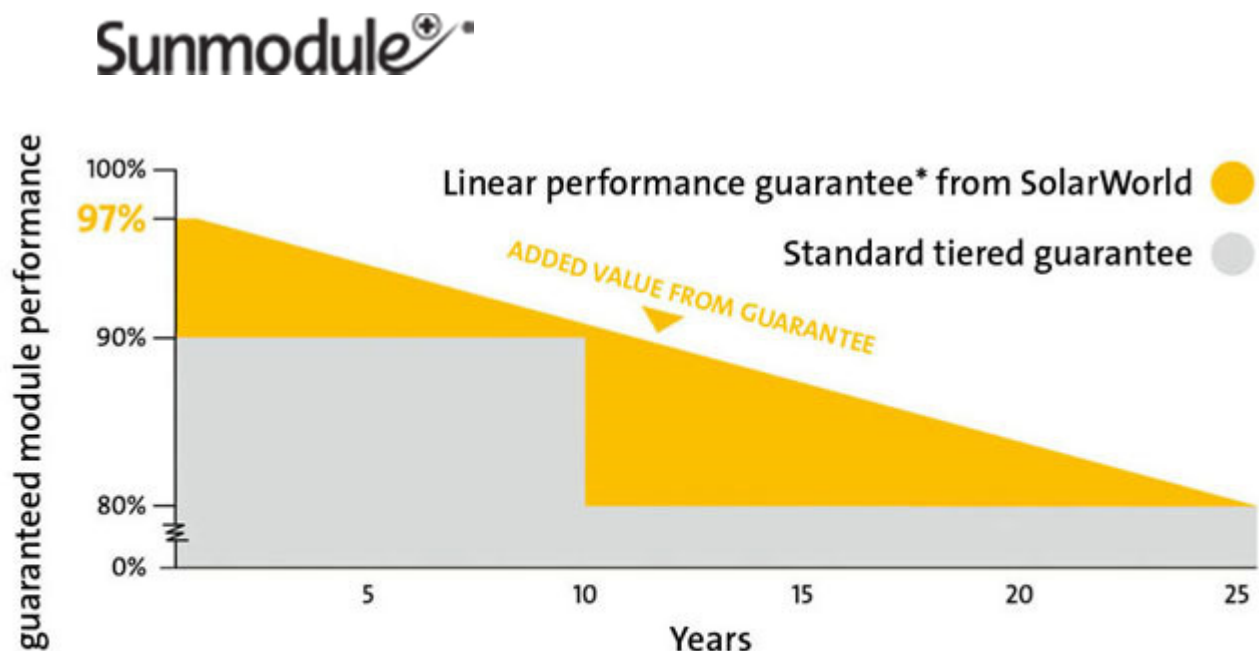

- + High-performance monocrystalline cell structure
- + 25-year linear performance guarantee
- + 10-year extended product workmanship warranty
- + The only true black module on the market today.

Mono

Mono-Black

SolarWorld black modules offer an elegant design that blends with the roof line, providing a sleek, modern appearance

*25-year performance guarantee in accordance with the applicable SolarWorld service certificate upon purchase.

Sunmodule® “Protect” Series Solar Panel

The new quality standard for solar panels

The new Sunmodule® Protect series is the latest addition to the SolarWorld range. It has set new benchmarks when it comes to service life, mechanical durability, degradation behavior its groundbreaking performance 30-year guarantee and also meets and exceeds all industry standards and certifications

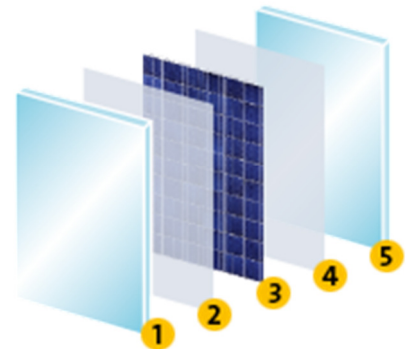

0.35% annual degradation with 30-year linear performance guarantee Performance guarantee for Sunmodule® Protect solar panels

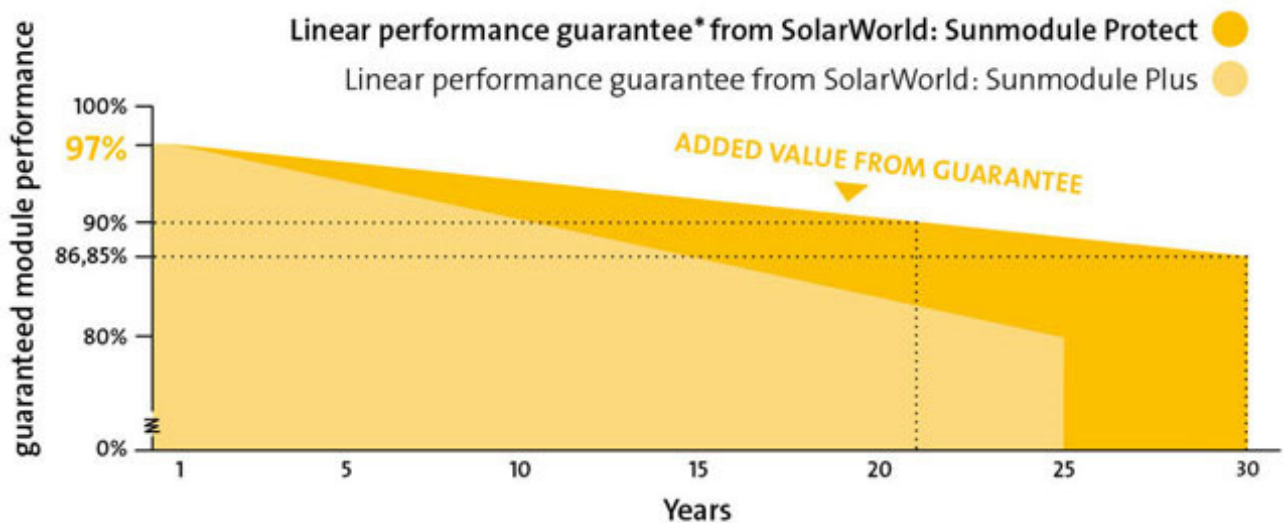

- + 10-year product workmanship warranty
- + 30-year linear performance guarantee
- + At least 97% of nominal power in the first year
- + Guaranteed maximum performance reduction of only 0.35% per year
- + Guaranteed performance of 90% after 21 years
- + Guaranteed performance of 86.85% after 30 years

Key product features:

- 1 2-mm-thin solar glass with anti-reflection coating
- 2 Ethylene vinyl acetate (EVA)
- 3 Solar cell matrix
- 4 Ethylene vinyl acetate (EVA)
- 5 2-mm-thick solar glass with imprinted reflection grating

Sunmodule® “Protect” Series

*30-year performance guarantee in accordance with the applicable SolarWorld service certificate upon purchase.
